Ayahuasca (AH-YU-WAH-SKUH)

We all know that mental health is a global growing crisis. We are in contract with three expert clinical researchers from Kings Collage University, London. In association with Heroic Hearts Foundation they are taking war veterans suffering with PTSD into the amazon to see if this South American traditional psychedelic brew could help overcome their traumas. For the first time in a ceremonial format the experts will be using EEG brain scanning technology to see how this plant is potentially helping them.

Our experts last success was the first ever government funded study into the use of ayahuasca on treating mental trauma. The team in partnership with the Medical Research Council and National Institution for Health Research and were given an investment proposition to design a study. The government's goal; to determine if this practice is safe, effective and could potentially be used in Western medicine. Can this be used to help people suffering with PTSD?

A project I am proud of is Winter Palace, in partnership with Point Prod in Switzerland and commissioned by an international streamer. 1899. Winter Palace follows the history of André Morel, a young and ambitious hotelier who had a daring vision: the very first five-star Alpine palace that will stay open throughout the winter season.

## I'M BRINGING TO MIPTV\*

Three of the projects that I am bringing to MIPTV are :

-ROAD 45 : a police thriller which follows the story of Nassim, a young illegal migrant who is thrown through the looking glass when he chooses, on the surface, to collaborate with Europol officers, risking his freedom, and ultimately his life in his relentless quest to save his beloved from the most powerful Mafia clan in Southern Europe.

-SARA - a breathtaking police series that plunges us into the heart of the debates on surveillance, freedom and security.

-THE MYSTERIOUS FLAT 72 - True Crime documentary.

On 25 March 2022, in Montreux, Switzerland, a French family jumped from the 7th floor of their apartment. One man and his wife, her twin sister, but also the couple's two children, aged 15 and 8. A fall of 82 feet, one after the other. Without a scream. Between conspiracy theories and survivalism, fears of the Covid and end-of-the-world anxieties, this documentary tells you the mysteries of this family drama.

WINDLIGHT PICTURES**

**WINDLIGHT PICTURES  
GMBH**  
GERMANY

**Drama/Fiction/  
Scripted Format:**

Feature Film, Miniseries, Series, Drama

**miptv**<sup>®</sup>

In June 2021, I launched the Munich-based premium scripted label Windlight Pictures with ITV Studios. From this new venture coming in 2023 is *Night in Paradise*, a dark, edgy drama based on Frank Schmolke's graphic novel and starring Jürgen Vogel and Lea Drinda.

Previously, as Executive Producer International Television Series at Bavaria Fiction, I led the creation, development and funding of international drama co-productions such as *Arctic Circle* (Elisa Viihde/ZDF), *Freud* (Netflix/ORF) and the critically acclaimed high-end drama series *Das Boot* (Sky), being heavily involved in all creative aspects of the series as non-writing showrunner. Sold to more than 100 territories worldwide, *Das Boot*, starring Tom Wlaschiha, Vicky Krieps, Franz Dinda, Lizzy Caplan and many more, quickly became the most successful Sky Original series ever for Sky Deutschland, as well as the most successful non-English Sky Original series ever for Sky in the UK.

A Business, Media and Film Studies graduate of King Alfred's College in Winchester and a true anglophile, my career has involved numerous creative collaborations in the UK. I was the producer of Tandem Productions' drama *Spotless*, a Netflix Original in the UK, which was written by Ed McCardie, filmed in London and starred UK actors including Brendan Coyle, Miranda Raison and Liam Garrigan. I also produced Kate Mosse's *Labyrinth* starring John Hurt, Tom Felton, Jessica Brown Findlay, Sebastian Stan and Vanessa Kirby, and was Production Supervisor on Ken Follett's Primetime Emmy winning and Golden Globe nominated miniseries *Pillars of the Earth* starring Eddie Redmayne, Ian McShane, Hayley Atwell, Matthew Macfadyen and Sarah Parish.

### **I'M BRINGING TO MIPTV\***

With years of experience as a producer in high-end television under my belt, my team at Windlight Pictures and I have already put together a topical and diverse development slate over the past 2 years. Focused on drama series but with several features in development as well, we are actively looking for co-production and licensing opportunities. Apart from this, I am always keen to connect with other creatives to share insights and pave the way for future collaborations.

### **PARTNERS I'M LOOKING FOR\***

I am particularly looking forward to meeting with network and streaming partners from Europe, the US and Canada as well as co-production partners from around the world.

Proudly, we are now one of Ireland's largest live action production companies creating content for young audiences and have, more recently, completed work on our own purpose built TV studio.

One of our most well known titles to have sold internationally is a series first produced for TG4 called 'Science Guy' 42 X 25' (Is Eolaí Mé). We also have a series on Amazon Prime US and UK called 'Mr Mender and the Chummyjiggers', this is doing great for us and was first produced for RTÉ Jr. I am extremely lucky to be working with a highly energetic and talented team.

We have some great series and formats in our catalogue but I am most excited about a fantastic and fresh new series called 'Simon Says', first broadcast in Ireland on January 23rd. This show was designed and directed by the same team as the hugely successful 'Swashbuckle' for CBBC. Its first premiere will be on Irish Public broadcaster TG4 in Autumn 2023.

And in a whole other genre (Under 35s), we have a new 6 X 55' crime drama series which goes into production in September 2023.

An 8 Episode TV Series, 3 Cold Dishes (The Absence of Death)

Welcome to "3 Cold Dishes, The Absence of Death" the gripping and intense TV series that takes you on a heart-wrenching journey through the lives of three women who were betrayed by the men they trusted and forced into a life of sex slavery.

As the series opens, we see how the women were able to escape from their captors and form an unbreakable bond that fuels their desire for revenge against those who wronged them. Through a series of flashbacks, we witness their descent into the dark world of human trafficking, as well as the trauma and pain they experienced.

But these women are not just victims; they are warriors, determined to take down the corrupt system that allowed their exploitation to happen. The show seamlessly blends the genres of crime, thriller, and action, as the women navigate a dangerous world of drug trafficking, corrupt officials, and violent criminals.

As they fight for justice, the women also struggle with their own personal demons and relationships. The show explores themes of family, friendship, love, and betrayal, adding depth and complexity to the characters and their motivations.

Through stunning visuals and masterful storytelling, "3 Cold Dishes" takes us on a journey through West Africa, exposing the harsh realities of human trafficking and the people who profit from it. The show doesn't shy away from difficult topics but also highlights the power of resilience, friendship, and the human spirit.

With its thought-provoking themes, dynamic characters, and heart-pumping action, "3 Cold Dishes" is a must-watch for anyone who wants to experience a powerful and unforgettable TV series.

### I'M BRINGING TO MIPTV\*

I'm bringing my collaborative skills: As an African storyteller, collaboration is essential to success in the industry. So far it is what has made animation in Nigeria develop into the state it is at the moment. Building relationships with fellow animators, producers, and directors, not just from Africa but all over the world can lead to new opportunities and successful projects.

I'm also bringing my eyes for details and nose for unique stories. Active listening to talks and panels at the events will provide an opportunity to learn from other professionals in the industry. Being an active listener, asking questions, and engaging in discussions can help me gain valuable insights and build new connections.

Additionally, I will be able to contribute some technical expertise. Self-taught, I was the first stop-motion animator in Nigeria when I started in 2015. My experience over the years has given me a few valuable insights that will be interesting to share.

### PARTNERS I'M LOOKING FOR\*

Aside from an opportunity to learn, showcase my work, and stay up-to-date with the latest developments in the industry, I'm also looking to network with other stop-motion animators, and producers and hopefully get funding opportunities for upcoming projects.

Brexit Through the Non-political Glass is my first feature documentary film which is now streaming on Amazon Prime, as well as Tubi (20th Century Fox) and Xumo (Comcast / NBC Universal), and are available from smart TV, cable stations and numerous digital set top box offerings. The film will be released on Kanopy in March 21st 2023. I made film in co-production with Perfo Slovenia, co producers Ales Pavlin and Andrej Stritof.

As a very small production company Partisan Media, we covered a very dense topic- Brexit. We see it as a great success that relatively low budget the film is now distributed in so many streaming channels and we are proud to see that people are watching it. Due to still challenging post covid situation, we were not able to advertise the film.

Right now I am producing Three Little Hearts is First Season 6 episodes in production with Syonmedia from Canada. And feature documentary film Magna Carta on Mars with the executive producers Philippa Kowarsky, Alex Cooke and Alan Hayling.

## I'M BRINGING TO MIPTV\*

I have further 2 international projects and I am seeking international partners to collaborate with them on production of them.

1.Feature documentary film Space Junk. This environmental documentary reveals the danger and catastrophic outcome of us junking the Lower Earth Orbit with the expired satellites which can eventually crash back down on Earth and cause an unprecedented environmental disaster and manslaughter. For this film we need a co-producer from Australia, Canada, USA and Africa. We will include the past events which led to a scale of a disaster after caused by the expired satellites. For instance crash of the nuclear powered USSR satellite Kozmos 954 in 1977 on Northern Territories in Canada, NASA's Skylab Space Station crash on Australia in 1979 and a space junk hit a woman in Oklahoma Tulsa in 1997.

2.Feature film The Story of Europe. We already have 2 co-production partners attached to this movie, Marek Rozenbaum from Transfax Israel and Ales Pavlin and Andrej Stritof from Perfo Slovenia. We need further co-production partners from Germany and France. Drama is based in 5 countries: Slovenia, Germany, France, Israel and UK. It reveals a struggle of 3 women, one is fight the regime, on is part of the regime and one does not believe in democracy. At the very end of the film we find out that they are all from the same family but of different generations and how one generation doesn't learn from the pervious one.

## PARTNERS I'M LOOKING FOR\*
